# **NAME**

archive\_read\_new — functions for reading streaming archives

# LIBRARY

Streaming Archive Library (libarchive, -larchive)

# **SYNOPSIS**

```
#include <archive.h>
struct archive *
archive_read_new(void);
```

# **DESCRIPTION**

Allocates and initializes a struct archive object suitable for reading from an archive. NULL is returned on error.

A complete description of the struct archive object can be found in the overview manual page for libarchive(3).
